**EMA<sup>®</sup> Cloud Service**

## Cloud-Service with EMA<sup>®</sup>: Compliant Archiving as a Service based upon your needs

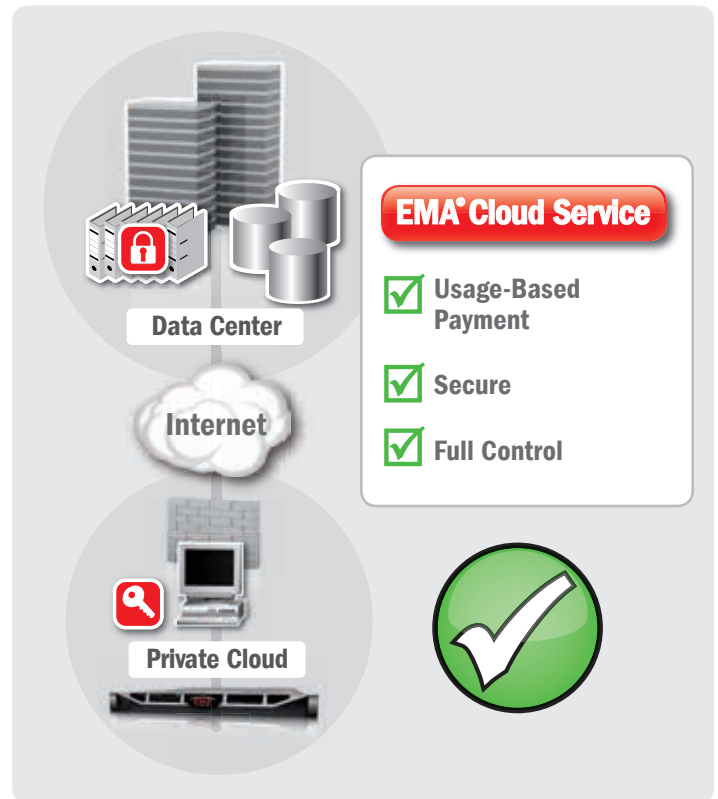

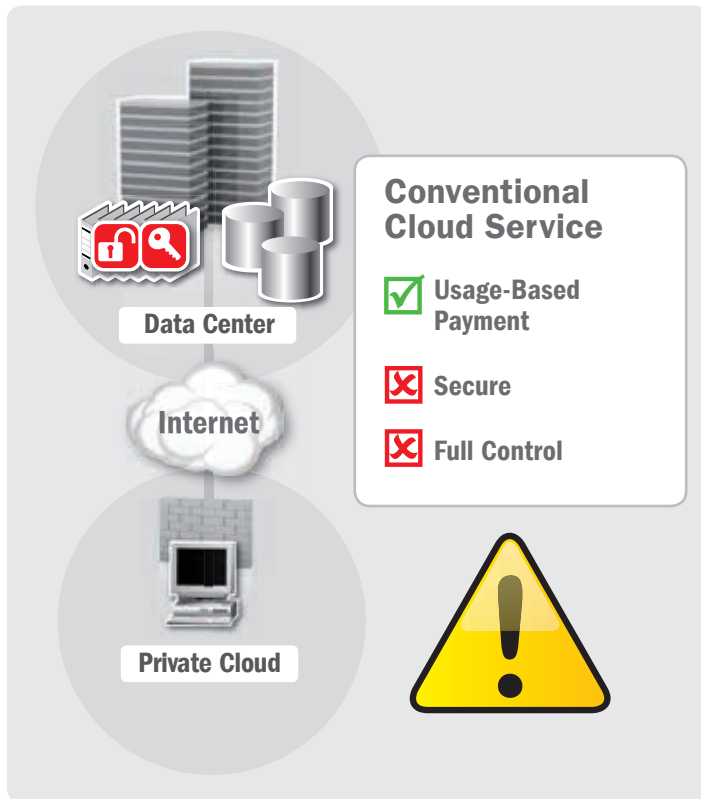

### Cloud Computing: The Challenge for Security

Almost everybody is talking about "Cloud". In general we have to separate between public and private cloud. Private clouds are quite secure due to the fact that all equipment is under control of the customer. The total opposite will be found with the public cloud solution. With a public cloud there is the possibility to store data unprotected and unsecured in a remote datacenter which could be accessed by unauthorized person.

Many companies are interested in a Cloud solution due to the reduction of costs or have already setup appropriate infrastructure. Cloud solutions at the moment are only partly secure and suffer with technical limitations. If the entire set of data is migrated to the cloud, there will be a simple question: What will happen if the company will not have access to the cloud network?

### *Solutions for Business Continuity*

# EMA<sup>®</sup> Enterprise Managed Archive<sup>®</sup>

With increasing costs for purchase and management of IT infrastructure, a Cloud Services Solution will be considered as an option for many companies. Nevertheless you should never lose the focus of securing access and availability of your data. A cloud based solution is only reasonable if the solution and advantages are 100% secure.

#### The Solution: Cloud-Service with EMA<sup>®</sup>

The innovative approach of EMA<sup>®</sup> Cloud-Service is focused to combine all technical and financial advantages of a public Cloud solution with the added value of maximum security and availability. A special target is to protect your data: Instead of giving away the entire control to a cloud provider, we provide a more secure approach.

#### Attractive and cost effective: Pay as you grow

EMA<sup>®</sup> Cloud Service is attractive to companies who want to prevent huge initial investments. Based on a fixed monthly fee per user, you will receive the requested service combined with the needed availability of your data.

Just select the desired performance, the archiving module and additional optional features. EMA<sup>®</sup> Cloud Service will be calculated on your individual needs and not based on a Vendor calculation. Based on your requirements you will get a flexible, custom designed, standards based solution which will fit exactly into your cooperation.

#### EMA<sup>®</sup> Cloud-Service means:

- ✓ Financial advantages
- ✓ Maximum availability
- ✓ High security

The Procedure to enable the service would be simple. Just select the needed EMA<sup>®</sup>-Modules, the number of users and select the timeframe. EMA<sup>®</sup> will be immediately ready for use with full cost control.

EMA<sup>®</sup> Cloud Service provides full access to your data at any time, if you wish fully managed with a service package, with a fixed monthly fee per user.
